FRONTEND DEVELOPER

I'm a motivated novice front-end developer with proficiency in JavaScript, HTML, and CSS. I have practical experience creating dynamic and responsive websites, with an emphasis on clean, efficient code. Committed to lifelong learning and staying updated with the latest developments in web technologies, I am excited to contribute to projects, apply my skills, and collaborate with experienced developers to deepen my understanding of front-end technologies.

SKILLS

HTML	Attention to details
CSS	Critical thinking skills
JavaScript	Problem-Solving

PROJECTS

Food Shop

September 2024

HTML, CSS, and JavaScript were used in the design and development of the food shop project. Users can quickly access requested products through easy navigation by categories or name-based searches. The website is fully responsive, providing an optimal viewing experience across a range of devices, including smartphones, tablets, and desktop computers.

Game

August 2024

I used HTML, CSS, and JavaScript to construct the game Rock, Paper, Scissors. This classic game allows users to play against the computer. The outcomes of each round, including whether the user wins, loses, or draws with the computer, are displayed. The game is designed to be playable on various platforms, including tablets, smartphones, and desktop computers.

Chef Website

May 2024

The Chef website focuses on providing information about the chefs and their quick, simple, and high-quality services. It features images of the chefs along with biographical details, including their names and personal backgrounds. This website, created using HTML, CSS, and JavaScript, is designed to be accessible on laptops, tablets, and smartphones.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Engineering in Computer Science

2024-2026
